

Full Consultation Services

Congratulations on taking the **FIRST** step toward building habitat and planting kindness on your own property.

The information I collect during this conversation will help guide me as I create a plan custom-designed to your needs and goals.

The following services are included as part of the **Consultation** fee:

- One in-person visit to discuss goals, lasting between 30-90 minutes depending on property size and vision
- Property walk to gain an understanding of what problem plants may be present, scope of invasive removal
- Detailed conversation to understand goals and where you are in the journey to improve the ecological services of your property
- Written property plan including educational material and resources, provided in a .pdf and print format:
 - The written plan is intended to provide a project plan for the client, and sufficient resources to move forward on your own without design services if you choose.
 - Moving forward on your own will involve extensive research but I do try to offer the resources to do so.
- Project plan **does not include specific species list**
- Assistance with VCAP application, if applicable is an addition fee
- The consultation is the first step in design services, if you choose to move forward with design an estimate of fees will be provided

Pricing: \$250.00 60-90 Minutes

(property > 1 acre with complex issues may cost up to \$350.00)
